Sir:

I, AMANDA E. LEONARD, a citizen of the United States
of America and resident of Gahanna, Ohio, do declare and
say that:

I am a co-inventor of the above-referenced application
for patent filed on July 24, 2000.

In the Office Action of December 17, 2002, claims 1-6,
8-9, 11-17, 19-22 and 47 are rejected under 35 U.S.C.
102(a) as being anticipated by Tyrdik et al. (C. Cell Biol.
149(3):707-717, May 2000; GenBank accession number
AF170908). Additionally, claims 10 and 15 are also

rejected under 35 U.S.C. 103(a) as being unpatentable over Tvrdik et al. (J. Cell. Biol. 149(3):707-717, May 2000; GenBank accession number AF170908). Further, claims 23 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tvrdik et al. (J. Cell Biol. 149(3):707-717, May 2000; GenBank accession number AF170908) in view of Lassner et al. (The Plant Cell 8:281-292, 1996).

I, along with my co-inventors, conceived and reduced to practice the invention claimed in claims 1-5, 8-24 and 47 prior to the publication date of the Tvrdik et al. reference, as evidenced by the following:

Attached Exhibit A illustrates that, prior to the May 2000 publication date of Tvrdik et al., I identified the nucleotide sequences of MELO4 and MELO7 as well as the encoded amino acid sequences of the proteins. I constructed two vectors (i.e., pRAE-84-4 and pRAE-87-4) using the cDNA sequence of MELO4 and cDNA sequence of MELO7, respectively, and cloned these two vectors.

Attached Exhibit B illustrates that, prior to the May 2000 publication date of Tvrdik et al., I transformed host cells (i.e., yeast cells) with the respective cloned vectors in order to express MELO4 and MELO7.

Attached Exhibit C illustrates that, prior to the May 2000 publication date of Tvrdik et al., I established the

elongase activity of both the MEL04 and MEL07 polypeptide sequences.

In summary, the attached Exhibits establish that the claimed invention was conceived of and reduced to practice, prior to the publication date of Tvrdik et al. (i.e., May 2000).

Although all the dates on Exhibits A-C have been blocked out, such dates are prior to May 2000, with the exception of the witnessing dates which are subsequent to May 2000.

I declare further that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the instant application or any patent issuing thereon.

Respectfully submitted,

By: Amanda E. Leonard

We're also interested in detecting delta4-desaturated 16:1 in all of the samples.

Thanks!

Cut pRAE-84 (mmu) w/ XbaI - expecting ~9.4kb

Cut pRAE-86 (mmu) w/ EcoRI/BstI - expecting ~10.2kb

Cut pRAE-87 (mmu) w/ EcoRI - expecting ~15.2kb

Order primers to sequence these clones

Transform into SC334

pRAE-84-4, pRAE-86-1 & pRAE-87-4

Also streak 334(pYX242)

Need to check LA, RA, ADA, ALA, STA, EPA or DPA instead of LA

Pellet yeast cultures &
submit for full profile
analysismain prep just 10 of
cultures for pRAE-84
Sto 5 & 7Digest w/ enzymes to
confirm insert
